4. Grammar Notes

- 4.1 **Repetitive/ Durative:** The infix *-in-* indicates the event took place in a repetitive manner. *Mag--in--* is the timeless aspect. It can have corresponding forms for completed, incomplete and proposed aspects.

e.g.	<i>balikbälík</i>	coming back and forth
	<i>nagabinalikbälík</i>	coming back and forth for a period of time

4.2 Interrogative Pronouns

<i>Ano</i>		'What'
<i>Uno</i>		'To do'
<i>Sin'o</i>	si-+uno	'Who'
<i>Kanin'o</i>	kaN-+si-+uno	'Whose'
<i>San'o</i>	sa-+uno	'When in future tense'
	e.g. San'o ikaw makadto sa Manila?'	'When will you go to Manila?'
<i>Ka'uno</i>	ka-+uno	'When in past tense'
	e.g. Ka'uno ikaw nag'abot?	'When did you arrive?'
<i>Kasan'o</i>	ka-+sa-+uno	'When in past tense'
	e.g. Kasan'o ikaw nagbälík?	'When did you come back?'

4.3 Negatives

There are **four** negatives in Romblomanon. The differences in meaning and their syntactic positions are as follows:

<i>Indi'</i>	'lack of interest' or 'proposed pre-verb'	
e.g.	Indi' ako magbasa aring libro.	'I don't want to read this book.'
<i>Ayaw</i>	'prohibitive'	
e.g.	Ayaw magkänam ning kaläyo.	'Don't play with fire.'
<i>Bukon</i>	'predicative'	
e.g.	Bukon dikikädo ang sakit?	'The sickness is not dangerous.'
<i>Waya'</i>	'existential' or 'completed or incomplete preverb'	
e.g.	Waya' na suya' sa frige.'	'There is no food inside the refrigerator.'

Note: There are only two affirmatives in the language: *hu'o* and *igwa*. The latter refers to existential while the former is used in all other cases.

Note: The answer to 'Yes' or 'No' question in Romblomanon is the same as in Tagalog. It depends on whether the hearer agrees or disagrees with the question. When the hearer agrees he says, '*Hu'o*', then repeats the correct statement. If he disagrees he says, '*Bukon*', then gives the correct statement.
